

Offline Mode

For shipping with UPS, there's an offline mode:

The screenshot shows the Magento Admin configuration page for UPS carriers. The browser address bar indicates the URL: `fran/FrAdMiN/admin/system_config/edit/section/carriers/`. The page title is "Configurat..." and there is a "Save Config" button. The left sidebar contains navigation links for DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, and CONTENT. The main content area is divided into two columns. The left column has a menu with "SECURITY", "CATALOG", "CUSTOMERS", "SALES", "Delivery Methods", "Accounting", and "Order Processing". The right column shows the configuration for UPS, with options for "2 Day Express", "Overnight", "FedEx", and "UPS". The "UPS" section is expanded, showing two settings: "Enabled for Checkout" and "Offline Mode", both set to "Yes". There are checkboxes for "Use system value" next to each setting. A note below the "Offline Mode" setting reads: "Set to Yes for offline rates during checkout."

When Offline Mode is Yes, ship rate calculation is faster. No need to call UPS for live rates. Please use this with care; because it might give you outdated UPS shipping rates. Only use this `Offline Mode` for development; and remember to turn it off after use.
